🔗 Portfolio

Personal Summary

Technical Product Specialist with a software engineering background and experience delivering enterprise SaaS products. Skilled in product implementation, business analysis, workflow design, customer engagement, and cross-functional collaboration. Passionate about building AI-enabled products and transforming complex business requirements into scalable software solutions.

Work Experience

Technical Product Specialist, Scigeniq

08/2024 – present
Amman, Jordan

- Led the **end-to-end implementation of QMS systems** for clients — from initial requirement gathering to final deployment and configuration.
- Oversaw **data migration processes**, including validation, mapping, and scripting to ensure clean system onboarding.
- Provided **business analysis and solutions design**, translating complex requirements into actionable features and configurations.
- Delivered client-facing support through **Freshdesk** by managing tickets, resolving issues, and coordinating updates.
- Conducted **demos, training sessions (TOTs)**, and provided product expertise during client onboarding.
- Collaborated with development teams to guide enhancements based on real client feedback and regulatory needs.

Software engineer (full stack developer), Scigeniq

07/2023 – 08/2024
Amman, Jordan

- Developed secure and scalable **SSO solutions** using **Azure AD** and **Passport.js**, tailored to support multiple enterprise applications
- Built automation scripts for **data migration**, handling complex Excel transformations, and ensuring integrity when moving data into live production environments.
- Designed and implemented new features for QMS platforms,
- Integrated third-party systems and services such as **ERP**, and **SAP**.
- Contributed to platform stability, deployment pipelines, and debugging production issues.
